

Strut support bearings - expanded range

We are pleased to inform you that there are some positive changes in our product group „strut support bearings“. We were able to add 160 new references to our range, so that this product group now includes a total of 280 articles

The wider and optimised product range means that we can continue to offer attractive conditions for this product group in the future and cover a wide range of vehicles.

As part of the expansion, the number range will change accordingly as of 1 January 2019. Instead of the usual WM-F XXX format, only numbers beginning with 649xxxx will be assigned in the future. The logistics data for the new article numbers as from January can be found in the attached Excel file.

The new references will be available from March 2019. You will receive the corresponding price lists for the 2nd quarter of 2019 in advance.

**Metzger strut support bearing:
Best quality for maximum safety**
